

The New York
Stem Cell Foundation

Abstract Submission Agreement for The NYSCF Annual Translational Stem Cell Research Conference

In submitting an abstract for consideration for the NYSCF Annual Translational Stem Cell Research Conference, the primary author is responsible for ensuring that work described in the abstract was conducted in accord with the following rules and policies.

1. Abstract Submission Standards

All abstracts submitted should contain substantive results, whether experimental, calculated or theoretical, and must be included.

2. Promotion of a commercial product or service

Promotion of a commercial product or service is not permitted.

3. NYSCF Research Conduct Policy

Submission of an abstract constitutes a formal agreement and statement by the authors that they have conducted the reported research in accordance with applicable institutional and national guidelines and regulations regarding experiments on human subjects, live vertebrates or higher invertebrates and ISSCR policies on [Guidelines for the Conduct of Human Embryonic Stem Cell Research](#) and [Guidelines for the Clinical Translation of Stem Cells](#). Abstracts reporting any experimental work that was not conducted in accordance with these guidelines will be rejected by the Program Committee.

4. Identical Policy

Presentation material presented at the poster session must be substantively identical to that described in the abstract. In particular, the title, authorship, and scientific content of the presentation at the poster session must match that in the abstract.

5. Presentation Limits

The first author should be designated as the presenting author and present the work at the meeting. No presentation may be given by an individual who is not an author on the abstract, unless prior written approval has been obtained by the presenter from NYSCF.

6. Author Consent

Authors may not be listed on an abstract unless they have given their consent to the presenting author. All material must be the work of authors listed.

7. Presentation Agreement Remuneration

Abstract submission implies an understanding that the authors will receive no remuneration from NYSCF for participation.

8. Permission for Use of Name and Likeness

Authors give The New York Stem Cell Foundation, its agents and its representatives the right to use their names and likeness in promotional and other material published in relation to the meeting.

9. Permission of Publication of Material

Authors grant The New York Stem Cell Foundation one-time copyright for publication of material they may provide for inclusion in the proceedings for the conference. The copyright consists of any and all rights allowed by the copyright laws of the United States and all foreign countries. Authors understand that the proceedings, including my contribution, will be made available in printed and/or electronic form to the attendees of the conference, members of NYSCF's community, and other interested parties. Authors understand that NYSCF will hold the copyright for the proceedings and its contents. Authors understand that the copyright of the compilation of materials in the proceedings is not the same as the copyright of an individual item of material included in the proceedings. Authors understand that authors are encouraged to include copyright notices as appropriate on all the materials submitted to NYSCF for publication. Authors understand that NYSCF takes no responsibility for registering my copyright and advises me to take all appropriate steps to do so. Authors authorize NYSCF to sell or otherwise distribute said proceedings to the membership and general public. In return, Authors understand that NYSCF grants the right to reprint their contribution in any publication. Authors affirm that their contribution contains no matter that is defamatory or is otherwise unlawful or invades individual privacy, or infringes on any proprietary right or statutory copyright. Authors affirm that their contribution is original with them or that they have obtained permission at their own expense from the copyright holder for publication and will submit documentation, showing permission for use, to NYSCF at the time of submission of the materials to be distributed.

10 Indemnification Agreement

Authors agree to indemnify and hold harmless The New York Stem Cell Foundation, its agents and its representatives should the material presented or provided for publication be determined to defame, libel or slander an individual or organization, violate the confidentiality of any individual or organization, or infringe on another's copyright.

11. Right to Request Additional Information:

On occasion, the Program Committee may solicit additional information from submitters to ensure that the work reported in an abstract complies with the NYSCF Research Conduct Policy. Failure to reply satisfactorily to a request for additional information constitutes grounds for abstract rejection.

12. Preclusion of Rigorous Peer Review

While abstracts are evaluated for scientific interest and are citable, the brevity of the presentation precludes rigorous peer review. Thus, abstract acceptance by NYSCF should not be taken as endorsement of the validity or safety of research by NYSCF.
